

YANIS GALLOWE

Applying for a Master's Degree in Cybersecurity and Embedded Systems

yanisgall77@gmail.com · +687 99 96 48 · linkedin/YANISGALLOWE77 ·
github/YANYANG7

Computer science undergraduate at the University of New Caledonia, self-motivated and autonomous, seeking to pursue a Master's in Cybersecurity and Embedded Systems.

Passionate about system protection and network infrastructure security.

EDUCATION

Bachelor's in Computer Science TREC7

2023 – Present

University of New Caledonia

1st Year Bachelor's in Maths & CS

2021 – 2023

Univ. Mouloud Maameri, Tizi Ouzou, Algeria

Baccalauréat in Electrical Engineering, Honours

2021

Lycée Polyvalent Tizi Gheniff, Algeria

SKILLS

Software & Languages

Python, C, Java, JS, HTML/CSS, MySQL, PostgreSQL, Bash Script, Linux, Arduino, Flask, Blender, GNS3, Cisco Packet Tracer, Microsoft Office, XAMPP, GLPI, VMware VCenter, VSphere, ESXi, PRTG, Git, GitHub

Personal Qualities

- Team player, reliable and motivated
- Curious, autonomous, thorough

LANGUAGES

Kabyle : Native language

French : Profecient

English : Very good level

Arabic : Good level

CERTIFICATIONS

- IELTS Academic : Level C1, Score **7.0**
- TCF DAP : Level C1, 512 points (2023)
- SOC Essentials (S|CE) | EC-Council
currently in progress
- Driver's licence (Category B)

INTERESTS

- Active cybersecurity: OWASP Juice Shop, Burp Suite Pro, online CTFs, simulation projects such as an SSH honeypot and others (in progress)
- Computing, electronics, embedded systems and networking
- Technology: automotive, aviation, industrial innovation
- General culture: sport, documentaries, history, geography, languages, politics, cooking

EXPERIENCE

Network, Virtualisation & Security Internship – ENERCAL

Oct. 2025 / Jan. 2026

- Deployed a virtualisation system (high-availability RDS farm) for an ENERCAL branch office.
- Installation and maintenance of infrastructure: switches, servers, Fortinet firewall.
- Centralised monitoring via PRTG to supervise two ENERCAL sites.
- Park automation and management: templating and deployment of Linux virtual machines.

Personal Portfolio – yanyanOS v1.6

2025 / Ongoing

- Development of an interactive portfolio styled as a custom operating system.
- Built in HTML, CSS and Vanilla JavaScript with Claude, hosted via GitHub Pages.
- Live at: yanyang7.github.io

Tutored Project: Side-Channel Attacks (ChipWhisperer)

October 2025

- Hands-on work with ChipWhisperer boards in embedded cryptology and cybersecurity.
- AES decryption attack via power consumption analysis to recover the secret key.

Website Creation for an Architecture Firm

September 2025

- Development on Google Sites to ease usage for non-technical architects.
- Initial design in HTML/CSS/JS, then migrated to Google Sites for autonomous content management.
- Live at: www.aia.nc

Hackagou CTF

October 2025 and 2024

- Ranked 4th in 2024 and top team including professional teams throughout the competition in 2025.

Advanced Database Project

October 2024

- Designed a relational model from a set of specifications.
- Implemented in SQL with stored procedures, views and constraints.
- Wrote a detailed report explaining the work carried out.

Romi Robot

May 2024

- Built a two-wheeled mobile robot controlled via Bluetooth from an Android application.
- Programmed an Arduino board with motor shields and Bluetooth for movement control.
- Integrated commands sent from the app: direction, speed, stop.
